

DA-JW-I-10-T5

In both unsteady and all of the stars there were lifts that symbolized our community building and helping each other. through the movement as a class and movements in the smaller groups it conveys how everyone is unique and is different, and when everyone comes together we become one. We become one large community that lives together. Not only the dance itself showed community, but the creating of the dance showed community. The process of us creating choreography together brought us closer.
